SUMMARY

AI/ML student with expertise in ML, DL, and LLMs with hands-on experience in building RAG-based systems and AI-driven applications. Skilled in developing scalable, data-driven solutions and applying modern AI techniques to solve real-world problems. Seeking opportunities to leverage AI/ML skills in innovative and impactful environments.

EDUCATION

• Bachelor of Technology in Artificial Intelligence and Machine Learning	2023 – Present
Gyan Ganga Institute of Technology & Sciences	CGPA: 7.26
• Higher Secondary Education (12th Grade – PCM Stream)	2019 – 2023
Pt.L.S.Jha Govt. Model School of Education	Percentage: 77%
• Secondary Education (10th Grade)	2020 – 2021
Pt.L.S.Jha Govt. Model School of Education	Percentage: 87%

PERSONAL PROJECTS

•Articulate.AI

AI-powered verbal mock interview platform with voice interaction and AI scoring.

- Built end-to-end interview app that generates resume-based questions, conducts voice interviews via Whisper (STT) + TTS, and scores answers using Groq LLM (llama-3.3-70b).
- Implemented confidence scoring for opening questions and correct/partial/wrong scoring with reasoning for technical questions.
- Technology Used: Python, FastAPI, Streamlit, Groq, Whisper, gTTS, MongoDB.

•Healix

Self-Healing RAG System with auto error detection and answer validation.

- Built a RAG system with auto error detection, query rewriting, and answer validation to reduce hallucinations.
- Designed modular architecture achieving 90%+ answer accuracy via retry logic and quality checks.
- Technology Used: Python, LangChain, ChromaDB, Google Gemini, HuggingFace.

•SpendlyAI

AI Financial Intelligence System for automated financial data extraction.

- Built a multimodal AI system for automated financial data extraction (voice + receipts) achieving 95%+ accuracy.
- Reduced manual effort by 80% through intelligent automation.
- Technology Used: Python, Flask, Gemini Vision, LangChain, MongoDB.

•Doodling

Real-time multiplayer drawing game with live chat and dynamic scoring.

- Built a real-time multiplayer drawing game using FastAPI and WebSockets with live chat, timed rounds, and dynamic scoring system.
- Technology Used: Python, FastAPI, WebSockets.

TECHNICAL SKILLS AND INTERESTS

Languages: C++, Python, C

Databases: MongoDB, MySQL

Frameworks & Libraries: FastAPI, Flask, PyTorch, LangChain, TensorFlow, Scikit-Learn, Streamlit, OpenCV, pyaudio, matplotlib, numpy, pandas, seaborn

Automation Platforms & Tools: VS Code, Git, GitHub, Google Colab, n8n, HuggingFace Transformers

Areas of Interest: Machine Learning, Deep Learning, Large Language Models, RAG Systems, AI Application Development.

Soft Skills: Problem Solving, Self-learning, Adaptability

ACHIEVEMENTS / CERTIFICATIONS

- Bundelkhand Hackathon Finalist :** Bundelkhand Hackathon Finalist out of 50+ teams
- LeetCode:** 460+ problems solved
- Python Essentials 1 and 2**— Cisco
- C++ Programming**— Coding Ninja
- Introduction to Modern AI**— Cisco
